Detailed Action

This is the first Office Action corresponding to original filing.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Drawings

The drawings are objected to because in Fig 2, "00" apparently should - - 200 - -. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The abstract of the disclosure is objected to because of the use of the word "invention". Correction is required. See MPEP § 608.01(b).

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 10-41 (starting on page 21, have been renumbered 12-42.

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, 6, 8, 9, 11-18, 22, 24, 25, 27-32, 36, and 39-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Whitcomb (Pat. No. 6,244,718).

Application/Control Number: 10/090,897

in Control (Validoci), 10/090,

Art Unit: 3632

The patent to Whitcomb shows, for example in Fig. 10., a mirror (10) mounting means (16) and backing means. The mirror could be planar or convex. The mounting and backing means could be a ball and socket, or any other desired means (Col 6, Lines 9-12, including Velcro type fastener).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3-5, 7, 10, 19-21, 23, 26, 33-35, 37 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whitcomb.

As indicated above, Whitcomb accepts any type of fastening or securing means. That means that any of the fastening or securing means known to those skilled in the art could be used in Whitcomb's invention. As to the mirror per se, the use of a mirror not planar or convex is also considered as an obvious matter of engineering choice having no patentable significance, since a specific type of mirror has no effect in the instant invention.

Art Unit: 3632

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Freebairn (D 345,655), Newman (D 412,893), and Bell D 461, 190 S and D 471,200 S show mirror attached to different areas of a monitor.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner **Ramírez** at telephone number (703) 308-0748. The examiner can be normally reached on Monday-Thursday and alternate Fridays.

The fax numbers for this Group are (703) 872-9326 (official papers),
(703) 872-9327(official after final papers) and (703) 308-3519 (for informal papers).
Our Customer service fax number is (703) 872-9325.

Any inquiry of general nature relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-1113.

A shortened period for response to this Office Action expires THREE MONTHS from the mailing date of this action.
